

Crafting Change: Symposium on The Indigenous Development of Textile Machinery at GTTES 2025

As the world pivots toward sustainability and self-sufficiency, the textile industry stands at a critical crossroads. The Global Textile Technology & Engineering Show (GTTES) 2025, taking place from 21st-23rd of February at the Bombay Exhibition Centre in Mumbai, aims to be the catalyst for this transformative shift. One of the standout features of this event is the symposium hosted by the Veermata Jijabai Technological Institute (VJTI), focusing on the Indigenous Development of Textile Machinery.

A Call for Innovation

In an era where technological self-sufficiency is paramount, this symposium emerges as a beacon for India's textile engineering future. With support from the Foundation for Scientific and Industrial Research and the Indian Institute of Science (IISC) Bangalore, as well as backing from the India ITME Society, the symposium is set to redefine the landscape of textile machinery development in the country.

Date and Venue:

- **Date:** February 21, 2025
- **Time:** 2:30 PM onwards
- **Venue:** Hall 3, B2B Lounge, Bombay Exhibition Centre, Mumbai

The focus is clear: to drive innovation that can not only bolster India's position as a global textile powerhouse but also reduce dependency on imported machinery.

Why This Symposium Matters

India's textile sector is a cornerstone of its economy, but it is also facing challenges that require innovative solutions. This symposium aims to:

- **Discuss R&D Advancements:** Experts will share cutting-edge research and development initiatives that focus on indigenous textile machinery.
- **Encourage Make in India Initiatives:** By promoting local manufacturing, the symposium aligns with national goals of self-reliance.
- **Foster Collaboration:** The event will encourage partnerships between academia and industry, creating avenues for next-gen solutions.
- **Showcase Innovations:** Attendees will learn about new technologies designed to enhance productivity, efficiency, and sustainability in textile manufacturing.

Key Highlights & Expert Insights

The symposium will feature an impressive lineup of speakers, including:

- **Researchers from VJTI & IISc Bangalore:** They will present their latest findings in indigenous textile machinery development.
- **Industry Leaders:** Insights from those at the forefront of textile engineering, discussing real-world challenges and opportunities.
- **Policymakers and Investors:** Important conversations about government initiatives and funding aimed at boosting local manufacturing will take centre stage.

This gathering of minds will not only be an exchange of ideas but a strategic blueprint for India's technological independence in textile engineering.

Who Should Attend?

The symposium is designed for a diverse audience, including:

- **Textile Industry Professionals:** Stay informed on the latest innovations and trends.
- **Manufacturers & Engineers:** Discover homegrown technology solutions that can enhance operational efficiency.
- **Academicians & Researchers:** Network with industry leaders and explore collaboration opportunities.
- **Entrepreneurs & Investors:** Uncover potential investment avenues in the burgeoning field of textile machinery.

Join the Movement

This isn't just a symposium, it's a movement toward a more self-reliant and innovative future for India's textile sector. As the industry seeks to reclaim its position on the global stage, the insights and collaborations fostered here could shape the trajectory of textile machinery development for years to come.

Register Today!

Don't miss your chance to be part of this pivotal event. Secure your spot at the symposium and contribute to the dialogue that will redefine India's textile engineering landscape.
